Medical Bills

The patient is responsible for all medical bills in our office. As a service is rendered, our office prepares and submits standardized insurance claims directly to all primary insurance carriers. The amount the insurance company will pay is determined by the terms of your policy. We also bill secondary insurances for our patients. However, the responsibility for payment of your bills is yours regardless of the insurance provided. You will receive a monthly statement from our clinic as long as your account is active.

If you are having surgery, it is important to understand the fees that the insurance will cover and what you will be responsible to pay. Our Medical Billing and Collections department will answer any of your questions and concerns and can be contacted by calling 702.878.0393.
